A bit about me

Hi, I'm Sipo Kupiso, a Software Developer specializing in HTML, CSS, and JavaScript, with a growing focus on AI-driven solutions. I'm passionate about creating impactful, user-friendly web experiences.

Currently, I'm building an AI-powered chatbot for web development queries and designing a modern portfolio using React and Next.js to showcase my skills.

Recent

Work Experience

Workplace 1 - CT Intern - Application Development

E-commerce Platform

Easy Online Banking Application

Java

Easy Banking App is a simple and secure Java-based application that allows users to check balances, transfer funds, and manage accounts. It's built with a clean interface for smooth everyday banking.

E-commerce Platform

PenTest Scripts

Python GitHub Debian Linux

Currently collaborating on Penetration Testing scripts projects, that can be used by organisations for practicing phishing attacks.

E-commerce Platform

Personal Finance Management Application

Html CSS Javascript Jsx & Java

A financial tracker application that will help people track their expenses and save money.

E-commerce Platform

Health App

Html CSS Javascript

This Health App includes a wide set of data types that are commonly used across health and fitness of an individual. Data stored with the available data types provides users with a

comprehensive view of their historical health, fitness, and wellness data, giving insight into their daily activities. Build with HTML, CSS, JavaScript and PHP.
